

DD/R-901-63

19 June 1963

MEMORANDUM FOR: ORD

ATTENTION :

25X1A

SUBJECT :

Visit to

25X1A

1. This memorandum is in the way of a reminder of specific actions that seem desirable at [REDACTED] 25X1A

a. [REDACTED] 25X1A

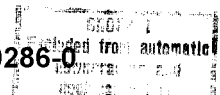

25X1A It was agreed that we would seek a method cover
25X1A story by which the [REDACTED] personnel could visit 25X1A
25X1A [REDACTED]. Remind me to discuss
this with [REDACTED] who can make such an arrangement.
The best plan of action seems to be that of buying only
two sets of the present design and doing the best job
possible with the present design. The second step would
be that [REDACTED] would institute a research program 25X1A
of new techniques. We also discussed the [REDACTED]
problem and I think you should discuss with NPIC beginnings
of ways and means for them to get some preliminary crude
pictures that they can evaluate.

b. [REDACTED] 25X1A

25X1A We listened to their feelings on the present and future
course of [REDACTED]. Our next step is a meeting with TSD.
I will arrange.

c. COMMO Project:

I think you should discuss with the COMMO personnel
their interest and contemplated use of this device. It will
be desirable to also have a discussion with the DD/P operators

DD/R-901-63
19 June 1963

to get their operational flavor. You should be able to make these arrangements; however, I will help.

d. Life Sciences:

25X1A I think perhaps, within the life sciences field, the [REDACTED] brain wave study may be worth following with some enthusiasm.

2. There are probably other items that have come to your attention and I suggest you make an appointment and we can run over all of these subjects in detail.
